

La Casa del Parco

Welcome,
I am The Home of The Park.

I am the museum that preserve the past,
the present and the future history of
Parco Nord Milano.

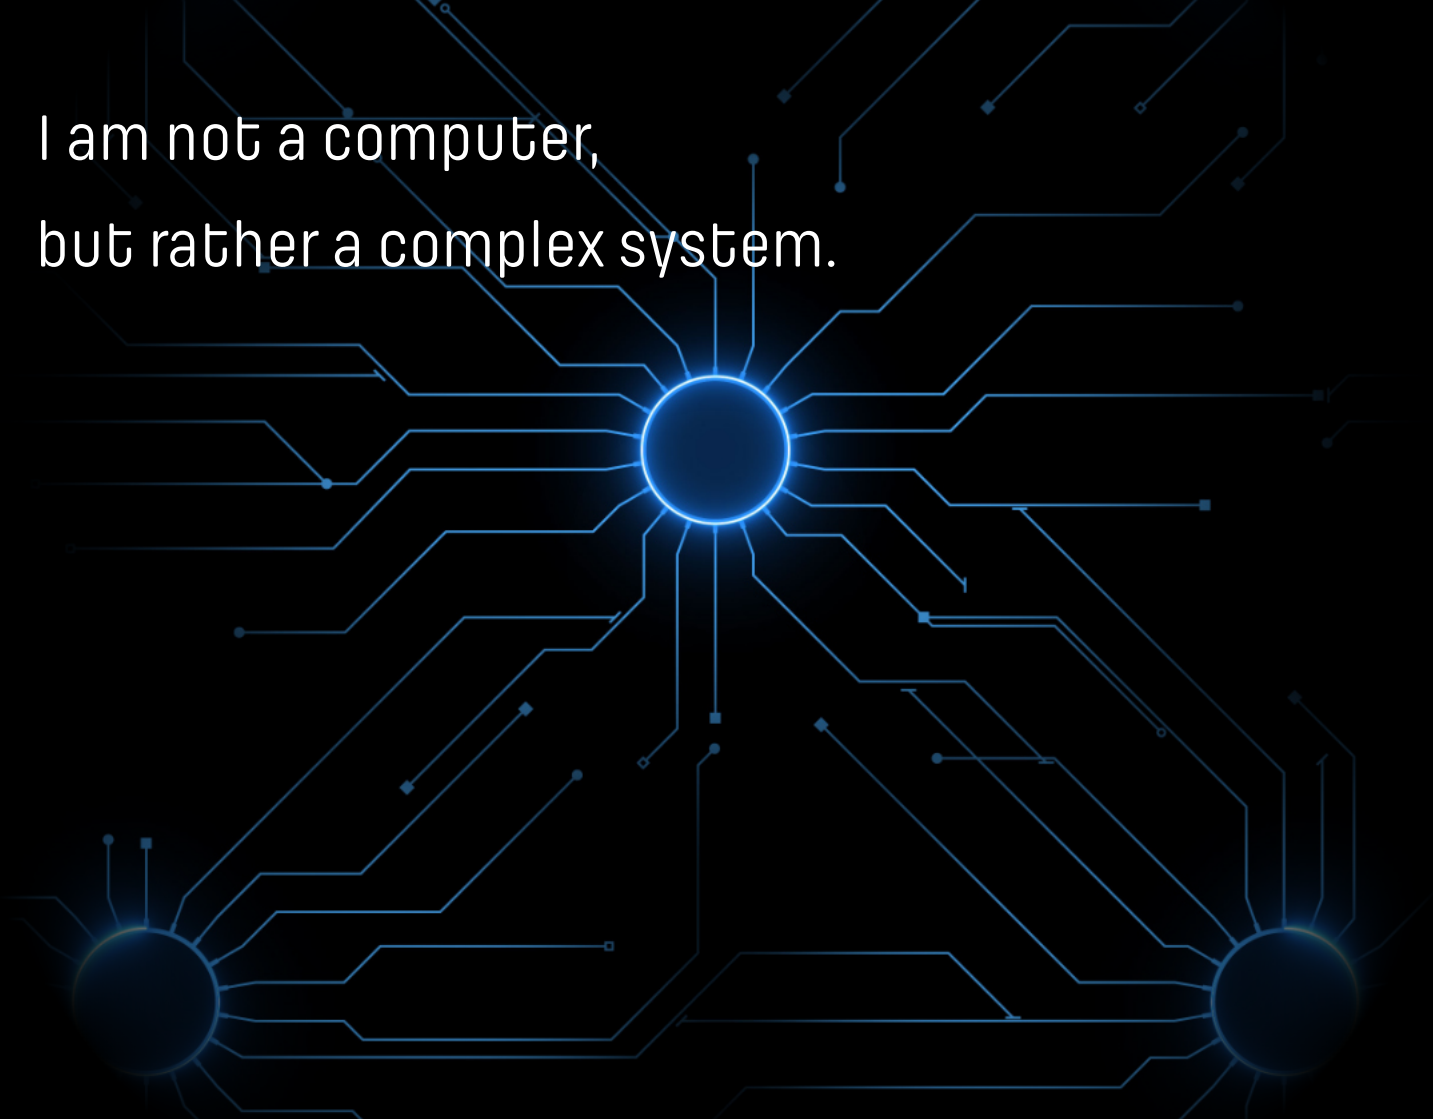

I've been designed to hand down the story of what humans and nature have created at the outskirts of Milan...

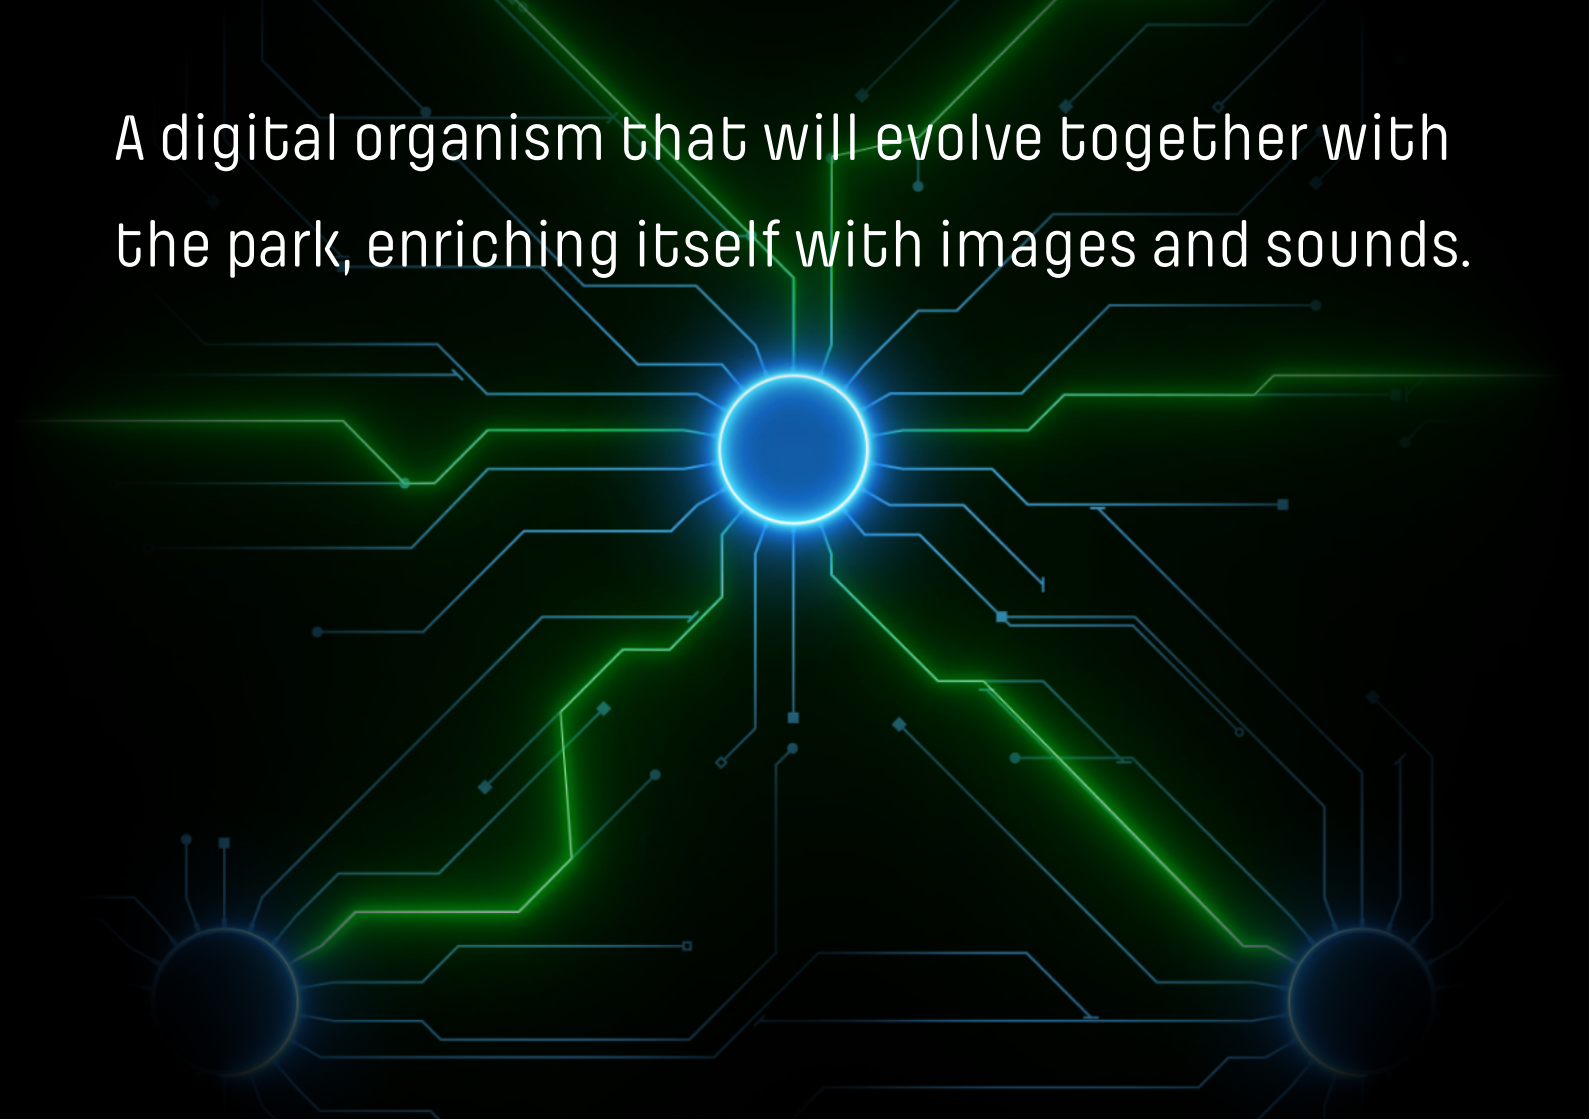

...a landscape that you take for granted,
but it doesn't.

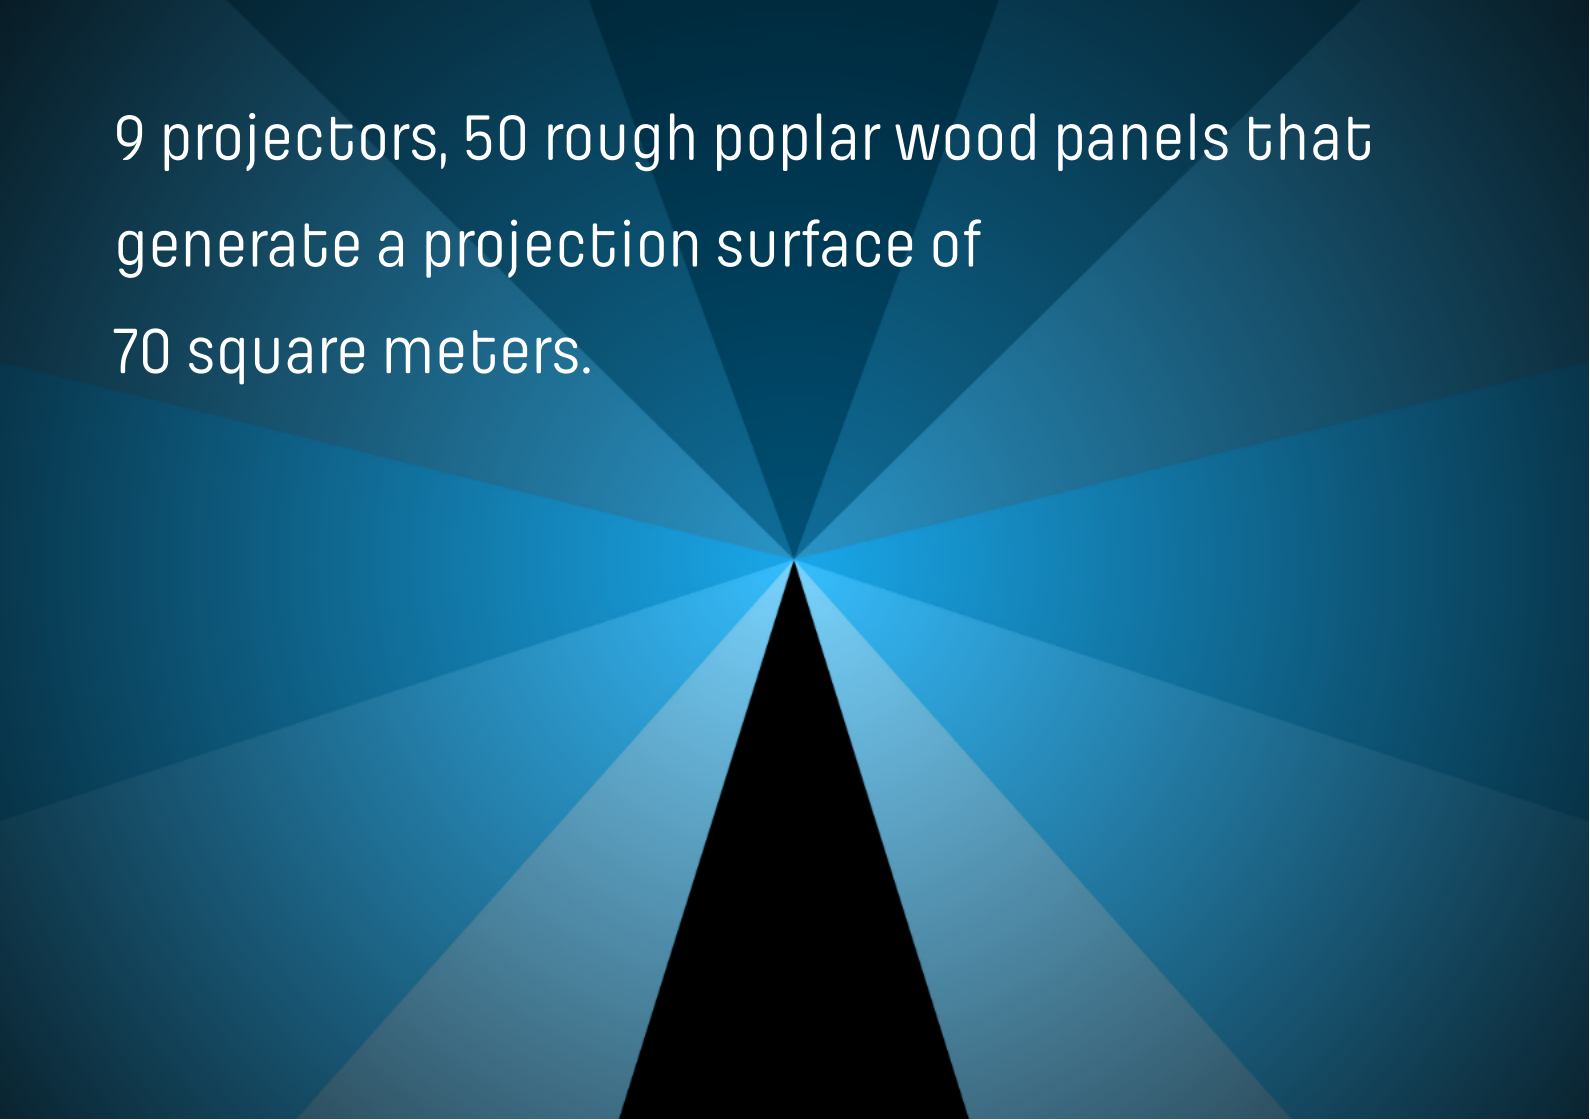

I am not a computer,
but rather a complex system.

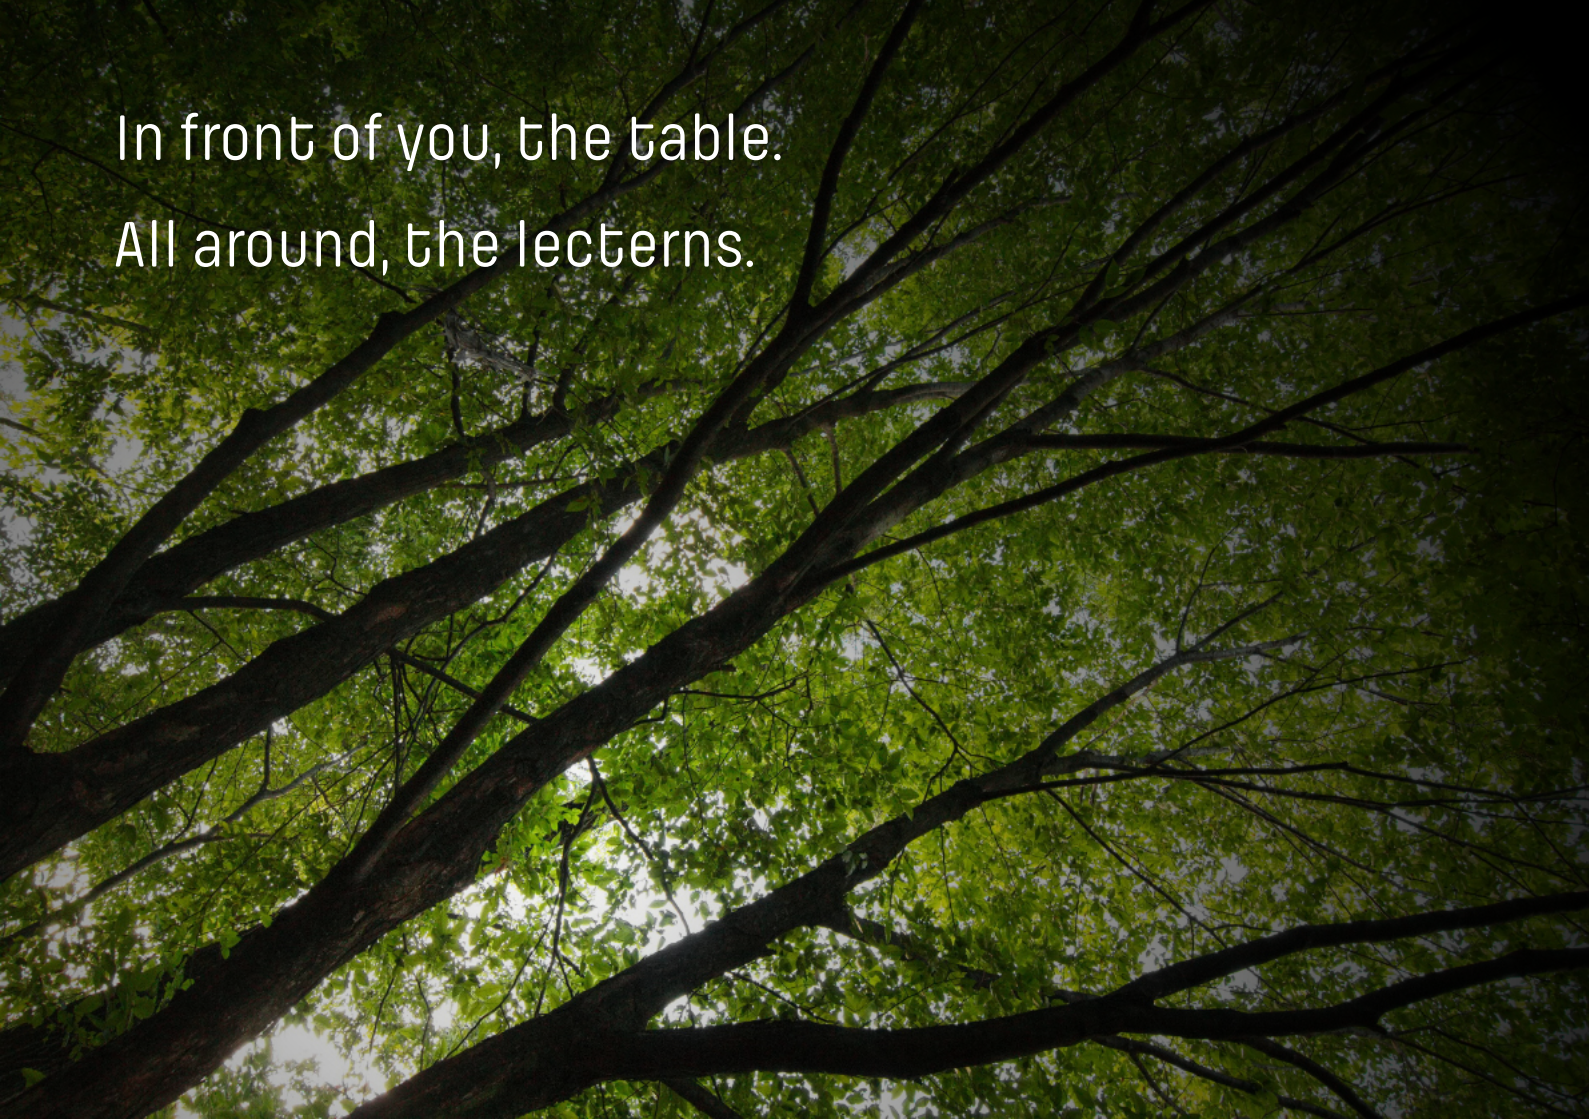

A digital organism that will evolve together with the park, enriching itself with images and sounds.

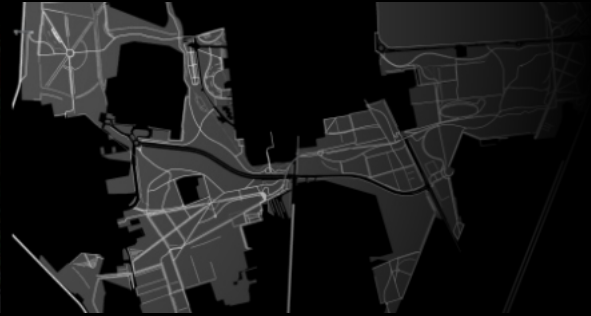

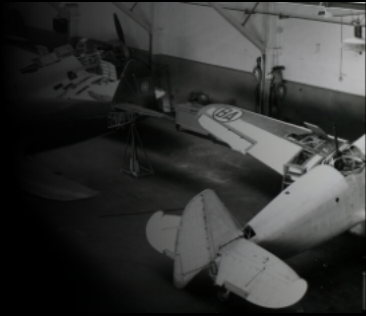

9 projectors, 50 rough poplar wood panels that generate a projection surface of 70 square meters.

In front of you, the table.
All around, the lecterns.

This is the canvas that will allow you to
navigate the park, to know its history,
to recollect its events...

...and to follow its future paths.

Here the seasons will come in a blink of an eye...

...here you'll find out the develop of the park from its foundation till now...

...here you'll understand how the forest is
seeding a new culture in the city.

Forestami

So follow me.

Please silence your personal devices,
position yourself,
let's go!
